It currently occupies a range of approximately 22,015 km (8,500 mi) (Barlow 1973), extending about 160 km north from Saint Louis. The purposes of this study were twofold: (1) to study the ecology of the tree sparrow in North America, and (2) to attempt to answer some of the questions raised by its very restricted range in North America. These questions can be stated in the following general form: (1) Are there competitive interactions between populations of the house sparrow and the tree sparrow in North America? (2) If so, what interactions may be involved in limiting the distribution of the tree sparrow? (3) If not, how are the two species partitioning their resource environment? To accomplish these objectives, I conducted concurrent population studies of the house sparrow and the tree sparrow and examined resource utilization patterns of the two species in areas of potential competition....
