Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Landscape Garden Series, Planting the Home Grounds Plant material is the medium which makes possible the realization of the third dimension of a landscape plan. It is the planting, in the last analysis, that makes for success or failure of a landscape design. In the successful design the planting articulates the whole scheme - makes the component parts cohere. Planting produces relief by giving elevation in place of flat monotony, and inspiring framed vistas in place of unbroken horizons. Color in flowers, foliage and fruit provides a means for producing charming contrasts with the quiet greens and browns of nature, delightful to the eye. Though architectural features and earthwork are useful aids in the same respect as planting, they are seldom successful unless combined with planting. Inanimate forms or masses can be seemingly instilled with life when relieved by living plants. The results produced by planting are so strikingly obvious that the layman is but indifferently impressed with the other factors of a successful landscape plan, and as a consequence, landscape development, whatever the type,...
