Reviews

This publication is fantastic. We have read through and i am certain that i will planning to read yet again yet again down the road. You wont feel monotony at at any time of your respective time (that's what catalogs are for concerning when you request me).

TOOLS FOR CONSTRUCTING CHRONOLOGIES

DOWNLOAD

Book Condition: New. Publisher/Verlag: Springer, Berlin | Crossing Disciplinary Boundaries | Tools for Constructing Chronologies focuses on ways of getting more out of existing chronological data by careful analysis. It surveys a range of cutting edge methods in chronology construction and seeks to enable cross-disciplinary fertilisation of ideas. The specially invited papers cover a range of timescales, from the perspectives of a number of disciplines. The methods used range from complex statistical treatments, to (non-statistical) considerations of how to systematically represent relative dating information. Each chapter can be read alone, but they are also carefully cross-referenced. The editors' introductory essay provides a cross-disciplinary overview of the state of chronology construction methods, and highlights the links between them. This book will appeal to a wide range of researchers, scientists and graduate students using chronologies in their work; from applied statisticians to archaeologists, geologists and paleontologists, to those working in bioinformatics and chronometry. | 1 Bayesian Chronological Data Interpretation: Where Now?.- 2 Pragmatic Bayesians: a Decade of Integrating Radiocarbon Dates into Chronological Models.- 3 Bayesian Inference of Calibration Curves: Application to Archaeomagnetism.- 4 The Synchronization of Civilizations in the Eastern Mediterranean in the Second Millennium BC: Natural Science Dating Attempts.- 5 Applications of Formal Model Choice to Archaeological Chronology Building.- 6 Complicated Relations and Blind Dating: Formal Analysis of Relative Chronological Structures.- 7 Genealogies from Time-Stamped Sequence Data.- 8 Tephrochronology and its Application to Late Quaternary Environmental Reconstruction, with Special Reference to the North Atlantic Islands.- 9 Constructing Chronologies of Sea-Level Change from Salt-Marsh Sediments.- 10 A Framework for Analysing Fossil Record Data.- 11 Taking Bayes Beyond Radiocarbon: Bayesian Approaches to Some Other Chronometric Methods. | Format: Paperback | Language/Sprache: english | 475 gr | 260 pp.
