BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 90 pages. Dimensions: 9.7in. x 7.4in. x 0.2in. Pursuant to a congressional request, GAO reviewed the Army's deployment of medical units in support of Operations Desert Shield and Desert Storm, focusing on: (1) problems the Army had in identifying, mobilizing and deploying medical personnel; (2) whether medical units had their required equipment, supplies and transportation support; and (3) whether medical units were able to evacuate and direct patients to appropriate hospitals. GAO found that: (1) the Army had problems in mobilizing and deploying medical personnel because information on them was outdated and unreliable, and many soldiers were undeployable or untrained for their mission; (2) the system to identify and assign active Army doctors and nurses to deploying medical units did not work, medical units did not keep their requirements current, and some units deployed without their full personnel complement; (3) some deployable hospitals were never fully equipped due to supply shortages and supply system malfunctions; (4) medical supply centers lacked supplies, trained personnel and transportation, and also experienced automation problems; (5) the size and weight of the forward hospitals and the lack of support vehicles limited the hospitals mobility; (6) evacuation of patients from the battlefield was hampered by the rough terrain, lack of navigation equipment, communication difficulties, long distances and the shortage of spare parts for air ambulances; and (7) the effectiveness of patient management was lessened by poor communications. This item ships from La Vergne, TN. Paperback.
